

The Arctic Spas® Story

You might be surprised that Arctic Spas®, known for world-class and cutting edge design, are conceived and built in the small prairie town of Thorsby, Alberta, Canada located just outside of Edmonton.

A small town like Thorsby stands for all that makes an Arctic Spa so exceptional: a personal commitment to all we do, the integrity and hard work with which each spa is built, and above all, the ceaseless investment in our customers' satisfaction.

At Arctic we work hard every day to offer a spa that surpasses what the rest of the industry has to offer with regards to longevity, efficiency, reliability and innovation. We believe if you ask around, you will hear we're a company built on small town principles with an eye to leading our industry worldwide.

Please take a few minutes to leaf through this brochure and explore Arctic Spas® with us – it would be our pleasure to get you in “hot water”.

ENGINEERED FOR

HARSHEST

(WHEREVER YOU

Proudly Manufactured in Canada. Sold Worldwide.

Surrounded by Inspiration

Canada is a majestic land of unending geographic beauty and variety. Our spas cannot help but to be influenced by our surroundings - from our luxurious western red cedar cabinet, to our patented FreeHeat® Insulation system, to the world leading Onzen™ salt water system, we have looked to the perfection of nature that surrounds us. Nature. Simply. Perfect.

Hand Built meets High Tech.

A visit to the production floor at an Arctic Spa facility showcases the best of both worlds. Precision cutting water-jet robots work methodically in our shell construction area while craftsmen hand-assemble our beautiful western red cedar cabinets. These components are combined in a blend of technology and touch, making the Arctic Spa truly unique -- possibly even the most prized possession in your backyard!

Certified Manufacturer, Industry Leader.

Arctic Spas® is among an elite group of manufacturers that has exceeded the audit standards required to achieve SpaSearch Certified status. This coveted award is based on an independent audit related to sales, service, operations and homeowner satisfaction.

Arctic Spas® is a leader in pursuing tougher energy use legislation, and will continue to drive the agenda of manufacturing responsible, safe and efficient products.

The Best Dealer Network.

All authorized Arctic Spas® dealers are required to maintain a minimum standard in on-going online training for both customer relations and product service. Many of our dealers have even exceeded our standards and have received SpaSearch Retail Store Certification as well.

THE WORLD'S

CLIMATES...

HAPPEN TO LIVE)

Health Benefits of Hot Tubbing

Arctic Spas® are good for you!

While hot water immersion therapy is centuries old, our understanding of its benefits continues to expand. Each and every day, we sustain a myriad of injuries spanning from the near imperceptible ache in the morning to those bumps, bruises, sprains and pains that accumulate and slow us down at the end of the day. Immersion in warm water dilates our blood vessels, dramatically increasing blood flow to our tissues. This remarkable process forms the basis for many of the benefits of time spent in a hot tub. As circulation increases, so does the healing effects that are a result of cell repair and replacement. Additionally, the likelihood of having deeper and less interrupted sleeping cycles (which has been related to the flow of blood back to the core from the extremities) allows extended periods for this healing to effectively occur.

Pain Relief

The buoyancy provided by water offers a great relief to those who suffer from chronic or injury-related skeletal discomfort. Chronic back pain can be relieved by removing the full load of gravity from the spinal column while immersed in warm water and increases activation of “feel good” neurotransmitters. This effect can be magnified by the massaging action of water jets and by ergonomic seating.

Natural Detoxification

Let's face it – hot tubs are hot. As our bodies attempt to maintain a steady internal temperature, our natural coolant, perspiration, flushes out many of the toxins and other undesirable compounds that we accumulate. In the face of an increasingly sedentary lifestyle, natural detoxification is at a premium.

Relaxation

Science aside, the most important benefit of time in a hot tub is the state of relaxation that's a part of every soak. In a world that heaps stress on us all, an Arctic Spa hot tub is a respite from the storm. We can recharge our mental batteries, and emerge from the water rejuvenated.

Family, Friends and Fun

Your new hub of family fun.

There is no better place to spend leisure time with friends and family than in an Arctic Spa. Laughing, chatting, listening, and sharing - these were the family interactions that once were a daily ritual of the family dinner table. Today, we are pulled in so many different directions; we are asked for more time at work, at school, even at play. Your Arctic Spa can be your new meeting place - reconnect with your kids, your spouse and your self.

From our earliest memories, we are drawn to water - kids and water are a natural combination! Add warmth and water movement and hot tubbing becomes the stuff of lifetime memories. Our beautiful LED lighting and water features will give those curious and playful minds a healthy outlet, and will build an appreciation for taking time for relaxation. As a matter of fact, time in the spa brings out the kid in us all, and who couldn't do with a little more fun? Smiles and laughter are standard features on every Arctic Spa.

Environmentally Sound

We Share this Planet

Leaving a smaller environmental impact is not a destination but an ongoing journey, and Arctic Spas® is committed to constantly making steps that further this cause. Canadians are inextricably tied to the land - we are blessed with incredible diversity and beauty and the respect for this land is a key part of our operations.

At the heart of our strategy is the reduced environmental impact of each of our spas as it operates year after year in your backyard. By using less electrical energy everyday, in every backyard, we strive to provide not only a reduced environmental footprint, but an economic benefit for our customers.

Some other green initiatives we are involved with:

- Not only has Arctic Spas® met all current efficiency legislations across the globe, but we have taken a leadership role, and have lobbied for more rigorous regulation and legislation of energy efficient requirements for the future. By raising the bar we are challenging our own organization and our industry to spend the time and resources to make efficiency a priority.
- Creatively looking at new ways to insulate better. Insulation is a key component in operating efficiency, particularly in cold weather climates. Our FreeHeat® Insulation system is the platform that we will evolve and refine and we will continue to progressively develop our spa cover systems as well.
- We are constantly looking to improve water quality through technology, thereby reducing the amount of chemical that must be added to spa water to keep it safe and clean. Our 1 micron filtration systems

physically remove many of the contaminants that other technology leaves behind to be chemically treated, and our continued development of the Onzen™ Salt Water system will drastically reduce the amount of sanitizing product that is required over the lifetime of our spas.

- We have partnered with PEFC for the ethical and responsible management of the forest areas that produce wood product for our spas. Through this partnership we are working to provide beautiful and functional cedar cabinets from highly sustainable sources.
- We are working internally to reduce paper products in our operations. Through a variety of technologies we have moved to electronic systems to replace paper systems. Our customer service and technician training sessions for example, are primarily delivered online - this has reduced not only the paper required for training manuals, etc. but the carbon footprint of airline flights for these training sessions.
- Paper products that we are still using are sourced from FSC-compliant sources wherever possible, and all our facilities use recycling extensively. Our production facilities have on-going quantifiable programs in place to promote and evaluate the reductions in construction material waste that we are able to achieve - there is always more we can do.

Arctic Spas® is invested in the communities where we maintain facilities. Our World Headquarters in Thorsby, Alberta, Canada is the primary employer in the area, and we contribute to programs that foster healthy, active, and environmentally sound lifestyles within this community. Our operations in Washington State, USA strive to do the same, participating in many events, festivals and programs that put the environment first. We hope that as you strive to make better choices for our planet, you support our efforts through your purchase. Thank you.

Self-Supporting Composite Hull

Guaranteed to Last a Lifetime

The shell of an Arctic Spa is undoubtedly the core of our design, and as such, is uniquely designed to handle this function.

We begin by vac-forming sheets of premium Lucite® Cast Acrylic with Microban®, transferring thousands of hours of mould design and engineering into a tactile form. Now unmistakably an Arctic Spa, we hand apply layer after layer of a proprietary filler-free fiberglass composite material to give this form its legendary strength. We apply more fiberglass than anyone else in the business - and no cost-saving shortcuts are taken; no plastic backing, no props or supports, and no foam is ever applied to our shell.

After numerous procedures to check strength and alignment criteria, shells head to our state of the art water-jet robotic and CNC cutting stations for trimming.

The result is a perfect blend of strength and accuracy - and the backbone for the application of cutting edge technology that is signature Arctic Spas®.

Is it more costly and labour intensive to build a shell this way?... absolutely. But we believe it to be the best way, and that has always been our pursuit.

Which house would you rather own?

The theory of insulation works the same for spas as it does for houses. House A illustrates the proper method for maximum efficiency and preventing heat loss. Unfortunately most spas are insulated like house B, with most of the insulation in the basement and the heating equipment outside! You wouldn't heat your house like this so why your spa?

ARCTIC SPAS®

Ambient heat from the pump penetrates the spa shell and heats the water. In winter this heat returns to the pump area in the event of a power loss.

OTHER SPAS

FreeHeat® Insulation System

Insulation in the right place saves you money, every day!

The investment in constructing a self-supporting shell allows Arctic Spas® to insulate differently than everyone else. For our design inspiration, we didn't have to look far though - our homes in northern Canada provided us all we needed. We insulate the exterior walls, the floors and most importantly the attics of our homes and we tuck everything important to us within this insulated envelope.

We have always believed that insulation below the water surface is of small value if the areas above and directly to the sides of the water are not adequately insulated (seriously, doesn't heat rise?). The "attic" of our design is our Castcore® Mylovac cover, which at 5" of thickness and featuring a full-length baffle is capable of retaining even more of your energy dollars. Next, high density polyurethane foam is applied to the cabinet walls and lip underside to a thickness that stops heat loss. We finish off this insulation envelope with the same foam applied into our floor systems. Then, we place all our equipment inside this cocoon, creating a perfect, stable operating environment.

More Innovation

We have taken our insulation to the next level. Already the best insulated cabinet in the world, our FreeHeat® Insulation system did not escape the exacting eye of our engineers. Our new overlap door insulation design removes the last opportunity for heat loss and captures even more residual equipment heat. To monitor this

increased capacity for trapping waste heat, we have enabled our spa packs to take in internal cabinet temperature data and to activate the innovative RossExhaust™ system to balance the cabinet temperature when required.

Lowest Running Costs

What does this mean for the spa owner though? Residual heat from our equipment, primarily our White Water motors, is allowed to penetrate through the fiberglass shell. This maintains spa water temperature and eliminates many of the heater cycles that other designs, particularly foam-filled insulated designs have to run. Fewer heater cycles mean a lower power bill each and every month.

True Freeze Protection

One last benefit of the FreeHeat® design that we hope you never need is the ability of the spa water's heat to keep the cabinet from freezing in a power outage situation. Without any insulation between the water and the cabinet, heat energy transfer can work in both directions. In our testing, and from anecdotal evidence, you have about 5 days, at -20°C before freezing occurs within the cabinet and adding an alternate heat source (space heater, trouble light) can prolong this grace period indefinitely. Nice to have some margin for error, isn't it?

Total Access

Being able to get to all spa components in the future just makes sense.

All Arctic Spas® come standard with insulated removable access panels on all sides of the cabinet. Many companies bury hundreds of potential problems completely in foam, effectively ensuring that service is a nightmare when this foam needs to be removed and replaced to perform any service. With an Arctic spa, it's simple. Remove a panel, perform the repair and replace the panel. We're simply being realists when we tell you that some fitting will leak during the life of the spa and we provide an easy and efficient way to deal with the inevitability.

Total Access also gives you the ability to upgrade your spa in the future. As we develop technologies or as your needs change, your Arctic Spa can easily be upgraded. There is no need to trade in your spa every few years when we can simply add jets, pumps, lights, music, purification or any other features in the future. Having to trade your spa in every few years to keep up with technology will get very expensive.

The Pad's Built In ~ Forever Floor®

All you need is level ground.

Already renowned for our sturdy insulated platform wood floor, standard on every Arctic spa, our engineers decided to raise the bar yet again by developing the Forever Floor®. Composed of SMC fiberglass composites, this floor is impervious to moisture, pests, and time. It completely eliminates the need for foundation materials like concrete, decking, or blocks! Just set it on firm, level ground, hook it up, fill and use. Installation has never been easier and your floor will last forever in any condition. In addition, your portable spa is now truly portable. If you move spa locations in your yard or if you move across town, the foundation comes with you. Be sure to order a Forever Floor® on your new Arctic Spa.

White Water Motors

Better engineering always results in better performance.

Arctic Spas® come standard with our exclusive European-designed and manufactured White Water Motor. This innovative externally-cooled and closed-body design is ingress protection rated to 1Px5. This is the highest resistance to moisture and particle intrusion in the industry, resulting in the most durable motors available anywhere. Not only are our White Water motors designed to operate in a warm environment, they are thermally-protected against extreme heat. All White Water motors sit atop vibration-isolating rubber mounts and of course, are positioned inside our FreeHeat® insulated cabinet - ensuring silent, consistent operation year after year.

By combining the power and efficiency of the White Water EMG Motor, the low flow restriction of our over-sized Reflex Torsion™ hose and our low friction, high -volume Pulse™ jets, the Arctic Spas® hot tub experience delivers a massage that is second to none.

Cedar

Grey

The World's Finest Cover: Castcore® Mylovac

Longest Lasting Cover. Period.

To top it all off, we offer an optional upgraded cover that is unlike any other in the industry. The Castcore® Mylovac cover starts with foam twice as dense as the industry average. We also insert a metal "C" channel into the foam centers. This creates a cover capable of supporting thousands of pounds of weight. Never worry about snow loads or kid loads again. We then wrap these inserts in a metal/poly bag (similar to a coffee bag). This bag is then vacuumed and heat sealed. This technology is the only system that is capable of completely keeping moisture off of your cover inserts. Wet and heavy covers result in constantly increasing running costs as well as regular cover replacement. Longer wind flaps, locking straps, carry handles, and an insulating baffle along the entire seam, finish off the best cover in the industry. This cover will save you thousands over the life of owning your spa.

Tru-Guard™ Heating

Guaranteed for five years, no questions asked.

Heaters fail more often than any other spa component. This is because most spa heaters use a heating element submersed into the water, directly exposing it to the potential hazard of chemical imbalance or poor quality water (a problem usually not covered under warranty). Arctic Spas® optional Tru-Guard™ heater uses the latest in heating technology to maximize efficiency and reliability for your peace of mind. The Tru-Guard™ heater element is sealed from water exposure with the same protective barrier used to coat commercial acid tanks. This patented coating prevents the build-up of minerals and shields against element corrosion.

Reflex Torsion™ Hose

Better performance, fewer problems.

Arctic Spas® is the first company in the industry to use Reflex Torsion™ hose in every spa. This highly specialized pipe is designed to fit externally over rigid PVC, which allows greater gluing surface, higher water flow and eliminates fitting leaks due to hose movement. Water in the spa hoses can be heavy and this pipe actually swells to absorb stress from the fittings. Reflex Torsion™ hose is clear with a colour-coded strand of PVC running through it. This makes for easy troubleshooting and allows us to see the coloured glue when we water-test each spa at the factory. If repairs are ever needed, a Reflex Torsion™ hose can usually be fixed with a hose clamp, long before a leak location in a full foam spa can be determined.

Arctic Spas® Management System

Great technology, easy to use and ready for the future.

The standard control system available on an Arctic Spa is the **Gecko** spa pack and topside. This premium-class control system is extremely dependable, and offers good upgradability and ease of use. Its capable self-diagnostic function makes service issues very straightforward - most issues can be resolved with a quick call to a technician. Heating, filtration and salt water system control are all programmable via the touch-pad topside control.

We now offer an upgrade to our new **Eco-Pak** control system. This cutting-edge platform is ready for the future with a faster processor, improved relays, an Ethernet connection to access the Internet, and features huge upgradability. With Internet connectivity, your spa becomes a portal to all the Internet can provide - real time monitoring, downloadable upgrades, interactive troubleshooting guides, tutorials - and we're just getting started!

Also available with the new Eco-Pak is our Bluetooth®/ WiFi module - **onSpa**®. If your spa is onSpa-equipped, any WiFi enabled device, such as an iPhone® can function as your spa remote control. With the **Arctic Spas® Smartphone Apps**, you can change filtration rates, operate jets, stereos and lighting systems. Additionally, you can stream audio from any Bluetooth - enabled device to the spa's stereo systems. Upgrades and updates to the Eco-Pak spa pack will be delivered via the Arctic Spas® Smartphone Apps*, so your pack's functionality can continue to grow seamlessly. And, best of all, as we continue to develop new systems, this platform has the capability to handle them all.

**Apps also available for Blackberry® and other smart phone devices.*

Amazing Therapy Jets

Great jets give great therapy.

Arctic Spas® patented rotating, bearing-less Pulse™ jets provide a range of massage from light and refined to deep and invigorating. As the nozzle smoothly rotates on a titanium shaft, water oscillates in a pattern that never stings. Our jets thread in and out, so that removal is never a hassle, but still retain an adjustable face to vary the pressure as required. With no ball bearings to ever seize and fail, your personal masseuse never takes a day off.

Unlike most other manufacturers, our spas use only rotating jets* – no stationary or “directional” jets are substituted to cut costs. Also, we no longer offer stainless steel jet-trim finishes – for an upgraded appearance we now offer Titanium finished jets. Titanium (Ti) is significantly more resistant to damage resulting from variation in water chemistry than stainless, and is extremely durable. Jet escutcheons, Therapy Air jets (if equipped), pump intake covers and external lighting sconces can all be clad in gleaming Titanium for a refined and luxurious finishing touch.

**Our independently controlled above water neck jet nozzles and our Monsoon jets are directional only, by design.*

The Monsoon jet is available on 8' models only.

Sparkling clean water, with a minimum of effort and the widest choice of user-customizable options.

As Arctic Spas® continues to refine our patented filtration systems and develop new purification ideas, our goal has always been to keep your spa water safe and clean, and to do so with the least amount of work for the spa owner as possible. Because of such vast differences in usage (bather load), source water quality, and other parameters, we realized that we needed to give the spa owner more choice. With some good advice from an authorized Arctic Spas® dealer, you now have many custom filtration and purification technology options.

Active Skim Filtration

Each Arctic Spa filter chamber houses our Active Skim Filtration mechanism, which constantly adjusts to the changing water level in your tub thus maintaining powerful surface skimming. With Active Skim Filtration, contaminants at the surface are drawn down into the filter regardless of water level, unlike typical systems. Additionally, the mechanism traps larger particles in an integrated basket, and does not allow them to be re-released back into the bather pool.

Arctic Spas® are now equipped with dual filter chambers*, which can house many combinations of filter media.

Silver Sentinel 1 Micron Filters

These depth filters trap particles within the filter media (up to 900 sq. ft in each filter) and offer the additional benefit of embedded nano silver antimicrobial internal coating. At an amazing 1 Micron level of particle trapping, Silver Sentinel filters offer the highest level of filtration, and

are disposable and recyclable. All Silver Sentinel Filters eliminate the need for many auxiliary de-foaming, clarifiers, filter cleaners and coagulating chemicals.

Microfiber Rescue Filters

These simple but effective filters can be used to quickly clean up your spa water after periods of high use, or low maintenance. They can be rinsed and re-used, and are very affordable. Great to have a few on hand, ready to have your tub sparkling for a weekend of entertaining!

Compact Pleated Filter with Microfiber Rescue Filter

This combination option provides the fine filtration of the Compact Pleated Filter technology with the versatility of a reusable bag filter. The microfiber bag filter can handle sporadic high-use or high-debris periods without requiring frequent replacement of the Pleated filter portion of the system.

**Dual filter chambers not available on the Arctic Fox model.*

More Control = Cleaner Water

Filtration cycles and circulation pumps are now living in harmony. All Arctic Spas® come standard with an adjustable filter cycle system using low speed on pump 1 to do the filtering. This system is now programmable from 1 to 24 hours of run time. With the addition of the Peak II System (optional), you can have a 24 hr. filtration pump system as well, which is also programmable in 1 -24 hr. increments.

Peak I Purification

Reliable and highly effective Ozone integration.

Peak I Purification consists of the addition of Arctic Spas® Peak Ozone system within the internal plumbing of the spa. During filtration, water moves through an area where it is exposed to activated oxygen, or ozone, which provides remarkable purification and oxidation functions. Highly concentrated ozone is created within our twin Failsafe™ generators, and then is injected into the water. The mixture of water and ozone is suspended in the turbulent Optical Vertical mixing chamber to significantly increase the contact time of ozone with water. This residual-free process results in many of the organic compounds being oxidized, leaving less work for the sanitizing products to do.

Peak II Purification

Now We're Getting Serious

The Peak II Purification system offers all the same benefits of the Peak I purification system but with a few additional features. We've added a circulation pump to the system for more efficient production and control of ozone production from 1-24 hours. We've also doubled the volume of the mixing chamber. Better mixing and longer contact time is guaranteed to improve results. Peak II also adds a secondary filtration system allowing 1-24 adjustments of filtration and ozonation. The circulation pump enables two functions - to provide passive filtration up to 24 hour per day, and to allow the flexibility of changing the run time of the circulation pump. Changing the run time allows the user to precisely manage power consumption to match local grid rates, or usage patterns.

**Peak II system only available with an Eco-Pak equipped Arctic Spa.*

***Peak II is not available on the Arctic Fox.*

Onzen™ Salt Water System

Intelligent, fingertip control for effortless, natural water care

Onzen Salt Water system is Arctic Spas® proprietary salt water system that produces sanitizer from naturally sourced Dead Sea salts through electrolysis. Salt-water sanitizer generation has several advantages over traditional sanitizer methods. Firstly, sanitizer is created, rather than added to the system and so there is very little on-going cost related to this system. The sanitizer that is created is of a pure form and therefore is quite free of residual, resulting in much longer water lifespan. The resulting spa water is much more gentle to skin and eyes, and has a similar salinity to a human tear.

Onzen has many unique features that have overcome previous challenges tied to salt water systems for spas. The first is that Onzen has a user-replaceable electrode cartridge. Electrolysis is a sacrificial process by definition - the electrodes will eventually deteriorate and require replacement. The replacement of the Onzen titanium electrode cartridge is a simple and inexpensive maintenance item that does not require the tub to be drained. The second key feature of Onzen is the ability to control the system either from the topside control, or via the Arctic Spas® Smart Phone App. This user adjustment can be used to match the sanitizer output of the Onzen system to the current, or anticipated bather load.

The use of the Onzen Salt Water system can significantly reduce the effort required to maintain clear and safe spa water, but we do suggest adding Peak I or II to maximize the benefit of the Onzen Salt Water system.

To run Onzen & Peak II together you must upgrade to the Eco-Pak

Arctic Spas® exclusive spa chemical line – Arctic Pure®

Arctic Spas® authorized dealers can provide a full line of Arctic Pure® chemicals for your spa. Using the approved Arctic Pure system ensures that your chemicals are economical, filler and additive - free and give greater consistency to your water maintenance program. Using non-approved chemical systems has been shown, in some cases, to cause component damage that may not be covered by your Arctic Spas® Warranty. Choose the chemical line designed for, and approved for your new spa.

Light Up Your Life

LED lighting adds to the safety of your spa, and highlights the beauty of our designs. Brilliant, long-life LED lighting is standard on all Arctic Spas® - how far you want to take it is up to you...

Standard LED System: Two digitally controlled underwater lights illuminate the spa with inviting blue light - enough light for safety, subtle enough for everyday use.

Northern Lights: Inspired by the Aurora Borealis of our northern winter skies, the optional Arctic Spas® Northern Lights system brings digital colour changes and fades to your spa. With an extensive variety of patterns and sequences, you can choose the perfect lighting scheme for your mood... The system has two light locations that work together to fill your spa with colour.

Northern Lights Deluxe: For an external splash of colour, our Northern Lights Deluxe system adds LED Sconces at all four corners of the spa cabinet, as well as the 2 underwater LED light locations. Accent your cabinet and water with colour changing digital control – and change the colour to suit the mood!

Ultimate LED Lighting

Arctic Spa lighting taken to the next level! In the Ultimate Lighting package, all jets are backlit through clear sections with technology that neither affects water flow, nor creates a leak potential. All controls and cup holders are backlit as well, and we top things off with beautiful Titanium sconces that house down light LEDs that illuminate and attractively accent our beautiful cabinets. All light sources are digitally controlled, and offer the full range of fades, solids and intermittent patterns. Ultimate Lighting is a beautiful addition to any Arctic Spa...

Arctic Spas® makes lighting the way to and from your spa easy with our onSpa® WiFi control system. Consider this option when choosing external lighting.

Arctic Spas® Audiovisual Systems

More things that go Thump! in the night.

All Arctic Spas® are available with the new Eco-Pak which has both Bluetooth® and WiFi connectivity. All of your music can now stream from a Bluetooth-enabled device such as any Smartphone to your spa - your device can operate from the shelter of your home, or can be safely contained in a waterproof case so your favourites, your playlists and all your content is available within fingertips reach. If you wish to use other spa-side devices, the system can be configured with a wired connection as well - your older generation iPod, CD and TV audio all can be connected to these systems.

WetTunes™: Our WetTunes stereo option gets a serious upgrade, as we have replaced our existing speakers with beautiful Poly Planar™ air-rise speakers. These speakers provide fantastic sound while providing great durability in adverse conditions. New as well, and mated to these speakers is a powered subwoofer, delivering thumping low-end sound from within our FreeHeat® cabinet.

Aquatremor® Stereo System: The basis of the Aquatremor stereo system is the use of tactile transducers rather than speakers. These transducers are bonded to the shell and cabinet and drive sound through both solids and liquids with incredible clarity, effectively turning the spa shell, the cabinet and the spa water into the “speaker”. As the human body is composed primarily of water, the sound waves pass through you as you relax in the water – so not only are you hearing the music - it surrounds you, moves through you and you truly feel it! Every Arctic Spa mould design now has a signature Aquatremor® Seat, giving the music lover the most direct connection to the music possible. Also available with Aquatremor is our downloadable vibro-acoustic massage. These massaging audio tracks use very low frequency tones to massage different muscle groups. It's a therapy that needs to be experienced.

Sonic Massage™ for Aquatremor®: Sound waves have been used therapeutically in the medical field for decades. The ability of sound to transmit through our tissues allows specific frequencies to target specific muscle and soft tissues, relieving stress and facilitating the healing process.

** Not to be used with external speakers as only the transducers can handle the extremely low frequency.*

Aquatremor® Deluxe: When you combine both our audio systems into one, you have created the best in spa sound available anywhere. The combination of high quality Poly Planar™ speakers, amplification, as well as tactile transducers will surround spa users with unmatched, opulent sound quality.

The Anywhere Waterproof TV

Now makes watching TV in your spa easier than ever. A simple transmitter hooked up to your cable or dish transmits the signal wirelessly to the TV, wherever the TV happens to be; and with 3-4 hours of rechargeable battery life, this TV is truly portable. You can now enjoy all the health and therapy benefits of your spa while enjoying your favourite show.

P.S. You now have a TV in every room of your house too.

Western Red Cedar Cabinets

Nature's Perfect Building Material.

Beauty, strength and accessibility are built into every Arctic Spas® cabinet. We construct each cabinet using kiln-dried, clear, furniture-grade Western Red cedar. This product is uniquely suited for our purpose, it has remarkable ability to thrive in a wide range of temperatures, humidities, and a high resistance to pests. In our design the corners are rounded with tongue-and-groove vertical cedar dadoed into top and bottom 2 x 4 rails. The sturdiness of our cabinets is incomparable. No sagging, shifting or misalignment will occur. All come with up to eight inset access doors, two on each side, allowing easy service and upgrades to any part of the spa. To finish the cabinet, two coats of a special, protective wood treatment is applied.

Western Red Cedar Stain

Unstained

Grey-Stained

Forever Flex™ Cabinets (OPTIONAL UPGRADE)

Maintenance-free Cabinets.

The Forever Flex cabinet is a beautiful alternative to our cedar cabinets. Most spa manufacturers do offer a composite cabinet, however these typically have a simple, untreated wood frame as an attachment point for the composite panel finish. With our Forever Flex cabinet, there are no wood products at all - the entire interior cabinet is constructed of pressure moulded fiberglass. This interior cabinet has the same impressive strength and durability as our standard cabinets. A durable, maintenance free plastic paneling is then used to finish off the product, complete with easily removable access doors.

Arctic Spas® Customization

With endless options, we'll build your spa your way.

With most manufacturers, you are often sold a spa with very little choice – as is, take it or leave it, and often it's the spa that's best for the dealer, not for you. At Arctic Spas®, you choose what's best for you!

With over 2.4 million combinations, including mould design, jetting configurations, purification, filtration and endless options such as our LED lighting systems and audio systems, we take your specs, your needs, your wants – all your choices, and build your perfect spa.

With good advice from your local authorized Arctic Spa dealer, you never have to buy more than what you want, and never have to settle for less. From a basic, low maintenance tub to the cutting edge Epic Series, Arctic Spas® is all about choice.

Choose Comfort

Above Everything Else.

Sport arenas, airlines and concert halls all offer a variety of seating styles - and when you have a choice, don't you prefer to choose the most comfortable chair? Bench-style, or "open concept" seating is great for accommodating large groups, but plush, ergonomic seats are built for individual comfort and are usually priced accordingly. At Arctic Spas® though, we believe that everyone deserves comfort - and you will see luxurious individualized seating in many of our mould designs. Our seats have been meticulously designed to wrap and support a wide range of body dimensions, providing multi-level armrests and adjustable headrests in all the right spots. In most of our designs, we provide gender specific and individualized seating, with consideration given to torso length, seat width and jet placement.

Within these sculpted seats, we have taken great effort to position our jetting packages to provide the best massage possible. We have launched our Dedicated Zone Therapy jetting profile. Within this system, select seats have a dedicated therapy function - you will see Neck and Upper Back stations, designed to provide stress relief for these common tension trigger points, whereas Lower Back and Lumbar specific stations target the muscles and soft tissues that support the lower spinal region. The jetting flow in these stations is tuned to match the size of the muscle groups within that area - large muscle groups have more pressure at their disposal, other seats which target more superficial muscles spread out the jet pressure for a gentler, more general massage. And, you will also see seats with no jets at all - because at times, a relaxing soak without jets is just what's needed.

We believe there is much more than jet count and horsepower rating to a great massage, and a great hot tub experience. Our R&D team works diligently to use the high flow rate that is achieved by our White Water motors in the most efficient manner possible. We tune the pump wet ends, oversized Reflex Torsion™ hose and use sweep-Y fittings to maintain the desired pressure within the plumbing systems, and use a lot of high volume 5" Pulse™ Jets. More water volume, with a vast range of user-adjustable flow rate, through great Pulse™ Jets equates to great massage.

Arctic Headrests

Finally a pillow that works.

After years of issues dealing with poorly placed, deteriorating pillows, we believe we've finally come up with the ultimate pillow design. Our new telescoping design adjusts to perfectly fit varying heights of bathers. The pivoting mechanism also cradles the neck to maximize the comfort. The pillows are still removable for cleaning but will never be found floating around the spa. Finally, we've changed the product the pillows are made from. Most pillows are made from a polyurethane foam. These pillows absorb water and can deteriorate quite quickly in a hot tub environment. Our new pillow is made of a rubber like material called EVA. This material (used for CROC™ shoes) unlike PU foam, does not absorb water or deteriorate.

Lasting Scents™ Aromatherapy

Sooth your body, mind & soul.

The power of scent to positively change your state of mind is a widely accepted and utilized natural therapy, and a perfect enhancement to a therapeutic soak. Each Arctic spa equipped with Therapy Air incorporates our Lasting Scents™ inline aromatherapy system that introduces fragranced air directly into the spa. Our unique aromatherapy canisters release fragrance when opened and can be turned off when not in use. The combination of scent stimulation and hydrotherapy is powerful and soothing for both body and spirit.

Therapy Air

Lighter, bubblier massage.

Air, like water, can be used for therapeutic massage. Arctic Spas® offers an available Therapy Air package on all spas*. Therapy Air provides a gentler, bubblier massage than that of water jets. Unlike most other spas that draw cold air from the outside, Arctic Spas® Therapy Air System draws warm air from the heated air space under the spa providing a warm and comfortable massage.

**Air options are not available on The Epic Series.*

THE EPIC SERIES

The most powerful Arctic Spa ever built. 5 dedicated White Water pumps. World Leading Therapy.

In our pursuit of the most therapeutic spas ever constructed, we have combined new and proven technology to create a masterpiece - the 2011 Epic Series.

Each designated seating area in the Epic Series spas is powered by its own dedicated White Water pump, which has the capability of producing huge flow rates. Flow rate is nothing without low restriction plumbing and great jets, and the Epic has both. Water is delivered to over 60 of our patented bearing-less rotating Therapy jets via our exclusive oversized Reflex Torsion™ hose and sweep rigid fittings. The resulting oscillating massage is without comparison, and will offer the widest range of therapy options to the discerning owner.

Individualized therapy areas are controlled from the digital topside control, or with the Arctic Spas® Smart Phone App via the onSpa® Bluetooth/WiFi module. Of course, each jet can be individually adjusted for flow rate, and the supplementary venturi air component can be tuned as well. The result is the most personalized massage you have ever experienced.

ARCTIC FOX

The Arctic Ocean™ - The Original 4 Season Swim Spa

The 14' Ocean is the largest member of the Arctic Spa family and incorporates many of the benefits of a swimming pool into a family hot tub. This family fun and fitness spa combines the therapeutic side of hot tubbing with the entertainment and fitness aspects of a swimming pool.

For many spa owners, the cost of operation for a swim spa is a source of concern. With the Arctic Ocean, the same technologies that make our hot tubs so efficient are not only achievable but also perhaps even more relevant on a large volume of water where those efficiencies can make an even bigger difference on your power bill!

Each Arctic Ocean uses high flow Arctic Swim jets to provide the resistance current, with each pair of these massive jets powered by a capable EMG motor. Swimming or other athletic movements executed against water requires more effort, and this increased effort can give a great training effect. As your body is more buoyant in the Ocean, your effort is not hampered or limited by constantly impacting the ground, your skeletal system receives lower loads and your fitness can improve with little to no chance of injury.

Resistance Swimming (optional)

You have several options in the Ocean, the most common is to swim head-on into the current. You can however, with the assistance of the Super Swim Pro tether, swim with or without the current, in either direction. The tether not only adds resistance but assists with proper technique and body positioning

Resistance Band Training Area (optional)

Your Ocean can be equipped with a complete resistance band fitness station. Use the variety of resistance bands as you execute a range of movements, including training with the rowing station. Stainless steel rowing arms allow for smooth rowing action, and ergonomic heel cups keep you perfectly positioned

Relaxing and Therapeutic Spa Area

The Ocean features sculpted seating and well-thought therapy jet positioning to provide a regenerative experience for up to 6 people, and 6 water features add to the fun and relaxation as well. Enjoy low impact activity, or vigorous cardiovascular workouts anytime, and always have the option of a relaxing massage afterwards.

Whether it's fitness, therapy, fun or family, the Arctic Ocean really is the ultimate backyard retreat.

sunshine retreat

Outside Dimensions: 10' x 10' (304.8 cm x 304.8 cm)

Inside dimensions: 9' 5 1/4" x 9' 5 1/4" (287.6 cm x 287.6 cm)

Height: 9' 4" (285 cm)

Roofline: 11' 8 1/2" x 11' 8 1/2" (356.8 cm x 356.8 cm).

The Sunshine Retreat is designed for simple elegance. This 10' x 10' roofed structure allows you to enjoy your spa experience through most weather conditions.

hideaway retreat

Outside dimensions: 10' x 10' (304.8 cm x 304.8 cm)

Inside dimensions: 9' 5 1/4" x 9' 5 1/4" (287.6 cm x 287.6 cm)

Height: 9' 4" (285 cm)

Roofline: 11' 8 1/2" x 11' 8 1/2" (356.8 cm x 356.8 cm).

The Hideaway Retreat dimensions are the same as those of the Sunshine Retreat but boasts 1 x 4 cedar beneath the steel roof, as well as fiberglass reinforced screening on three sides of the gazebo for additional privacy and protection without detracting from the beauty of the outdoors or your spa's attributes.

the entertainer

Outside dimensions: 10' x 10' (304.8 cm x 304.8 cm)

Inside dimensions: 9' 5 1/4" x 9' 5 1/4" (287.6 cm x 287.6 cm)

Height: 9' 4" (285 cm)

Roofline: 11' 8 1/2" x 11' 8 1/2" (356.8 cm x 356.8 cm)

forest green enamel steel roof

brick red enamel steel roof

charcoal grey enamel steel roof

The name says it all! Perfect for entertaining, this Gazebo features two fiberglass reinforced privacy screen sides with optional decorative muntin bar inserts available in Tudor Square or French style lattice. Roof colors are available in forest green, brick red and charcoal gray to blend in with your current landscaping and meet your preferences.

hideaway retreat deluxe

Outside Dimensions: 10' x 10' (304.8 cm x 304.8 cm)

Inside Dimensions: 9' 5 1/4" x 9' 5 1/4" (287.6 cm x 287.6 cm)

Height: 9' 4" (285 cm)

Roof Line: 11' 8 1/2" x 11' 8 1/2" (356.8 cm x 356.6 cm)

This deluxe version of the Retreat series has the same fit-anywhere footprint as the other two, but adds all-round privacy screening and an elegant spring-loaded screened entrance door. The privacy and insect protection of the Habitat and Villa series in a more compact gazebo.

habitat

privacy screen

Outside dimensions: 10' x 12' (304.8 cm x 365.7 cm)

Inside dimensions: 9' 5 1/4" x 11' 5 1/4" (287.6 cm x 348.6 cm)

Height: 10' (300 cm)

Roofline: 11' 10" x 13' 4 1/4" (360.6 cm x 407 cm)

This luxurious gazebo is sure to accentuate any spa! The metal roof comes standard in forest green but can be ordered in brick red or charcoal grey. The Habitat features a spring-loaded cedar screened entrance door that automatically closes behind you. The gazebo is incased with fiberglass reinforced screens on all sides for maximum privacy and insect protection.

The gazebo also features windows that open on a lift hinge to allow communication with guests at the 12-foot fold down side bar. Bar stools not included.

habitat deluxe

privacy screen

Outside Dimensions: 12' x 12' (365.7 cm x 365.7 cm)

Inside Dimensions: 11' 5 1/4" x 11' 5 1/4" (287.6 cm x 348.6 cm)

Height: 10' at peak (300 cm)

Roof Line: 13' 4 1/4" x 13' 4 1/4" (407 cm x 407 cm)

All the luxury and style of the Habitat, in a more spacious twelve-foot square footprint. Comes with fibreglass reinforced screens on all sides for privacy and insect protection. Available in roof colors of Forest Green, Brick Red, and Charcoal Grey, all in durable enamelled steel.

beach house

Outside Dimensions: 23' 8" x 12' (721.4 cm x 365.7 cm)

Inside Dimensions: 23' 1" x 11' 5" (703.6 cm x 348 cm)

Height: 11' 4" at peak (345.4 cm)

Roof Line: 24' 2" x 13' 10" (736.6 cm x 421.6 cm)

The Beachhouse gazebo was made to house our swim spa, the Arctic Ocean. However, it can be used as a deluxe backyard entertainment enclosure even if you don't own the Ocean or another brand of swim spa.

Cedar Accessories

Arctic Spas® manufactures a complete line of cedar accessories to compliment any Arctic spa setting. From wrap-around bars to planters and robe trees, you can choose what best suits your backyard design. We use only 100% Red Cedar for its beauty and long life. All items are prefabricated for easy, on-site installation. Do it yourself, or let us build your unique cedar accessory combination.

plant holder

This 18" planter is the perfect way to add foliage for privacy or decoration. It complements the end of step units and comes as an easy-to-assemble kit. Plant holder does not include plant, pot, or soil. 18" H x 18" W x 18" L. A good match with a two-tier step set.

bar stools

An extra bit of height makes this 29" tall bar stool perfect for any gazebo with our bar packages or our café tables.

Accent your spa and accessories with red wood cedar bar stools. At 23" high, these sturdy bar stools are the ideal height for any of our spa bar packages. Each stool has a 15" diameter and a footprint of 18.5" square.

robe tree

Perfect for keeping your robes fresh and dry while you enjoy your spa, our robe tree stands 60" high with a 21" square footprint and holds up to 4 spa robes.

café tables

Our café table is perfect for mid-morning coffee or romantic drinks for two beside your spa. This gorgeous table stands 37" high.

storage bar

The new 72" storage bar features two tapered bins (each 29" x 11" x 10") and is conveniently designed for access from within the spa. Snacks, rubber ducks, beverages, books or magazines, the storage bar will keep all of your gear handy.

solo bar

Solo bars are the perfect compliment for your spa and add the finishing touches to your backyard retreat. The bar features rounded corners for a sleek, finished look and is perfect for entertaining. Sized to match your spa (64" or 72"), the bar is 11" deep.

corner bar

Used alone or in combination with one or two sidebars or other accessories, the corner bar is a flexible addition to your spa package. Bar stools not included.

side bar

Available to fit any of our spas, these 11" deep side bars can be used alone or in combination with a corner bar to form a wraparound entertainment area perfect for your back yard festivities. Bar stools not included.

2-tier storage step

This 36" step provides six cubic feet of storage space for towels, toys, or accessories and can double as a beverage cooler. It also makes a convenient cool down bench seat.

3-tier storage step

This new 3-tier storage step combines ease of entrance with the convenience of handy storage and out-of-spa seating. Two individual roomy bins provide easy top access and almost six cubic feet of storage. What will you keep in yours? Step storage dimensions are 72" x 24" x 22" .

2-tier step

Our solid 2-tier steps add safety and convenience for ease of access to and from your ground-level spa, as well as additional seating outside your spa! Available in a variety of widths (36", 64" and 72") to suit all spas, the total height of this unit is 16".

3-tier step

Climb your way up in the spa world with these solid 3-tier entry steps! Available in a variety of widths (36", 64" and 72") to suit all of our spas, each step is approximately 8 inches high with 11" treads.

2-tier corner step

A perfect compliment to our 2-tier steps, the 2-tier corner step is also available to complete a wrap around look.

3-tier corner step

The 3-tier corner step is the perfect wrap-around companion for our 3-tier steps. The curved corner unit adds a sleek, finished look, while providing the ideal space to complement your spa with foliage.

4-tier step for the arctic ocean

Our 4-tier steps add ease of access to and from your Arctic Ocean Swim Spa. The total length of this unit is a 72"!

4-tier corner step for the arctic ocean

Complete the look of the Arctic Ocean Swim Spa with a wrap around corner 4-tier step. Use it as a place to put your towel or snazz it up with some great looking outdoor plants.

lowered spa door

Due to the amazing efficiency of our HeatLock® system, in warmer summer environments we will often see spas maintaining 40°C (100°F) temperatures. These doors release some heat from inside the cabinet to moderate water temperatures.

2-tier stair package

Get it all together with a two-tier stair package. Side, end, and corner units are available to help customize your spa. Also goes well with the 18" plant holder.

3-tier stair package

Step on up with a total triple stair package. Side, end, and corner units all designed to fit any model of Arctic or Coyote spas.

4-tier stair package for the arctic ocean

Add the finishing touch with a total 4-tier stair package. Side, end, and corner units all designed especially for the mother of all spas; the Arctic Ocean!

bar package with stools

The wraparound combination of two side bars and a corner bar with a set of bar stools creates a convenient multipurpose entertainment counter that you'll use even when no one is in the spa!

Arctic Spas® Firsts

We lead where others follow.

In 2011, we introduced the world's first spa that can be conveniently controlled from your smartphone with onSpa®. With both Bluetooth and WiFi capabilities, onSpa® allows you to operate your jets and lights, change your filtration and purification rates (and music playlists!), troubleshoot, and seamlessly upgrade your systems via the Arctic Spas® App.

But as you can see, a groundbreaking year isn't a first for us.
